## LIGHT A CANDLE @ 8.30pm

To share the Light of Christ and to let those around us know we are thinking about and praying for them at this time, place a candle in one of the windows of your homes at 8.30pm till 9pm on each evening. Make sure you light it safely! If you have a pretend candle that would be even better. "It will be a sign of solidarity and hope in the light of Christ that can never be extinguished."

## **National church agrees new carbon target of net zero by 2030**

Christians from across the national Church have agreed a bold new climate target, by committing to make the Church carbon 'net zero' by 2030. At a meeting of General Synod, the Church's governing body, members voted in favour revising the date for this carbon target, encouraging all parts of the Church of England to take action and ramp-up efforts to reduce emissions. A motion was approved calling for urgent steps to examine requirements to reach the new target, and draw up an action plan. Jemima Parker, Diocesan Environment Officer, was at the debate, and said: "General Synod have taken a prophetic step in committing the Church of England to be carbon neutral by 2030. Creation is in crisis and to safeguard our common home radical transformation of all our lives, churches, and indeed our whole economy is needed in the next 10 years. It will of course be very challenging for each church and for the diocese as a whole to implement this, but we have all the technology we need to do so. It is now a question of putting it into practice. As a starting point I would urge every church to engage with the Eco Church award scheme.

## **June – Holiday highlights - To think about what we could be doing after Covid 19**

1. Going for a day out to the beach? Take a bag in your pocket and pick up any litter you see.
2. Planning your day out or holiday journey? Use public transport if you can to reduce your carbon emissions. Travelling by train or ferry to Europe can be part of the adventure.
3. If you are planning to fly for your holiday make sure you carbon offset the carbon you generate from your flight e.g. with Climate Stewards [www.climatestewards.org/](http://www.climatestewards.org/)
4. Holiday waste? When you are away try to take as much care to save energy, recycle; prevent food waste as you would at home.

## **July – Your electrical appliances**

1. You can save around £30 a year just by remembering to turn your appliances off at the plug rather than leaving them in standby mode. [www.energysavingtrust.org.uk/home-energy-efficiency/energy-saving-quick-wins](http://www.energysavingtrust.org.uk/home-energy-efficiency/energy-saving-quick-wins)
2. Take your phone charger out of the socket when not in use. It uses energy even when it's not charging your phone.
3. Buy A-rated electrical appliances whenever you can. They may be more expensive initially but you will save on your energy bills.
4. The location of your fridge can make a difference in how energy efficient it is. Make sure it is out of direct sunlight and not close to the oven. Keeping it against an outside wall will help the heat it generates escape easily, and always make sure that there is a few inches' space all around the fridge so that air can circulate.
5. Electrical gadgets are great, but the environmental impact of manufacturing them and disposing of them at the end of their life is high. Think before you buy more gadgets.
